# ToDo User Stories

## Stakeholders:

- **User:** Any person who uses the application

## Terminology:

- **Board (Public/Protected):** Group of lists, possibly identified by a key
- **List** - list of cards with a name for the list
- **Card** - item on a list with a title, a singular task to be done
- **Tag** - label for a card, groups cards

## Mocks:

## MUST Requirements (needed for passing)

As a user, I want …
- Create a board (without registration) so that I can manage tasks
- Create a list in a board
- Create a card with title in a list
- Share the url(or other form of identification) and allow others to access the board
- Drag and drop cards between lists
- Drag and drop cards to change order in the list
- Delete cards
- Delete lists
- Rename cards
- Rename lists

## SHOULD Requirements

As a user, I want …
- Add descriptions to cards
- Add a list of subtasks to cards
- Add a password to protect a board

As a user without password, I want …  (case with password protected boards - not sure we want to add it or not)
- See the board, however not be able to make any modifications to it

As a user with password, I want … (case with password protected boards)
- See the board and be able to ake modifications to it
- Change the password of the board

As a server admin, I want …
- To delete any board
- To change the password of any board
- To restart the server

# COULD Requirements

As a user, I want..
- Change the background of the board
- Tags :
    - Create a tag
    - Change the name or colour of a tag
    - Add a tag to a card
    - Remove a tag from a card
    - Delete a tag
    - Filter a list or board by tag
