Opening by chair

no minutes

Announcements

no minutes

Demo of functionality

Progress so far acceptable

Recap of the past two weeks

Buddycheck: read up on the feedback model to use in the next evaluation

Meaningful MR:

- resolve the conflict and establish expectations

-feedback for Kars: more communication, add comments to the code

Feedback on your group:

-need to discuss API for the project

Heuristic usability evaluation

-team 40 – Eve and Malou as points of contact

- send each other the mocks by Wednesday, to meet the deadline for the draft on Friday

- meeting on Thursday

Task distribution

-add requirements as issues, everyone assigns issues to themselves

-for now backend remains as backend to polish up the structure

-for now keep the frontend/backend teams the same, but after the next meeting we mix it up a bit

Summary action points

-fix database issues for the backend

- meeting to agree on the API on Wednesday, 10:00AM

-for frontend, polish the UI and add functionality:

    -titles

    -disconnect button

    -admin login at introduction page

    -look through and understand the backend

    -connect backend methods to UI as far as possible

Feedback round

    -there is feedback to read through on Brightspace

    -make input size as equal as possible from everyone

    -look through the technology rubric

    - read through the TA's feedback before meetings
